```

```
                            Text = g.Key,
```

```
                            Numar = g.Count()

```

```
                        };

```

```
            var result2 = from w in result

```

```
                        where w.Numar > 1

```

```
                        select w;

```

```
            result2.ToList().ForEach(x => Console.WriteLine($"Cuvant {x.Text} : Numar {x.Numar}"));

```

```
        } }

```

}

- **Variante de raspuns**

a)

Cuvant Ana : Numar 2

Cuvant are : Numar 4

Cuvant mere : Numar 2

b)

Cuvant Ana : Numar 1

Cuvant are : Numar 4

Cuvant mere : Numar 2

Cuvant nu : Numar 1

Cuvant Maria : Numar 1

Cuvant Andrei : Numar 1

Cuvant portocale : Numar 1

c)

Cuvant nu : Numar 1

Cuvant Maria : Numar 1

Cuvant Andrei : Numar 1

Cuvant portocale : Numar 1

d) Afiseaza eroarea : Cannot assign 'method group' to anonymous type property

- **Justificare raspuns**

Raspuns correct: a)

Programul calculeaza frecventa fiecarui cuvint si afiseaza doar cuvintele pentru care frecventa este mai mare decat 1. Nu exista nicio eroare.
